

PORTABLE COUNTING SCALE

DC-688 Series

The DC-688 displays the perfect blend of ruggedness for industrial environments and portability for operator convenience. A full-function keypad and a unit weight preset key provide instant counting capabilities. Operators can easily read weight, unit weight, and quantity values on the scale's high-contrast display, conveniently positioned in front of the platform.

The DC-688 features a battery life of more than 1000 hours, and programmable auto-off function that conserves energy when the scale is left idle. Although its wide platter can accommodate items up to 60 lb, the DC-688 weighs in at under 10 lb, making it easy to transport with or without its optional carrying case.

STANDARD FEATURES

- Extra wide stainless steel platter
- Three large numeric LCD displays for weight, unit weight and quantity
- Six preset unit weight recall memory keys
- Count accumulation and subtraction function
- Negative sampling and counting (count out of a full container)
