

FAIRBANKS®

ULTEGRA COUNTER INSERT

Fairbanks' Scales continues to innovate new products for more effective package shipping. The Ultegra Counter Insert is perfect for retail shipping centers that want to make shipping easier than ever.

LOWEST PROFILE AVAILABLE

The Ultegra Bench Scale is perfect for shipping applications because of its extremely low profile. The flat top version of this scale is a mere 2.48 inches high. When used with the insert, the scale fits below the counter — only the top portion of its platform is visible. This configuration makes it easy for customers to place packages on and remove them from the scale.

DURABLE

The Ultegra Counter Insert is made of rugged, stainless steel and is guaranteed to support the Ultegra scale and any package within the scale's weighing capacity. The insert requires minimal counter space and its quality, stainless steel surface is aesthetically pleasing.

MAXIMIZE COUNTER SPACE

Using the Ultegra and its Counter Insert allows for optimal use of your counter space. Instead of an entire scale on your counter, only a fraction of an inch of the platform height is visible. This keeps your counter looking clean, organized and customer friendly.

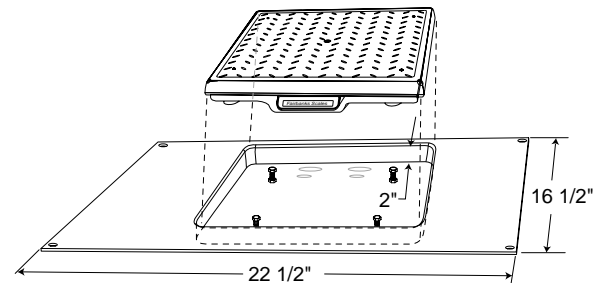

ACCESSORIES

Each Ultegra Counter Insert includes a splitter which, if desired, allows a user to connect two remote displays to the scale. Remote displays are also available as optional accessories.

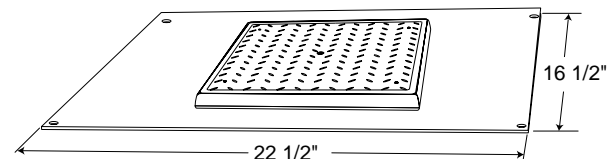

SPECIFICATIONS

Dimensions	22.5" x 16.5" x 2"
Material	Stainless steel
Shipping Weight	22 lbs.
Included Accessories	Splitter for connecting two remote displays
Additional Accessories	Remote displays
